

WHY I AM SILENT

Every day in the United States of America over **4,000 American citizens** are silenced against their wills. They have their voices permanently silenced and they never get the opportunity to speak on behalf of themselves. Today we stand in silent solidarity with those who have been silenced. Today we are silent, but by doing this we are being a voice for the one-third of our generation that will never have a voice. These victims are not only being silenced; they are being killed. The victims we stand on behalf of are not going to be mentioned on the news. The **victims** we stand on behalf of will not have a funeral. The **victims** we stand on behalf of were ripped from the safety and warmth of their mothers' wombs. The victims we stand on behalf of were not blobs of tissue, but beautiful human persons, with hearts that beat, brains that gave out brain waves, and a soul. These are the victims of the **abortion holocaust**. Every day over **4,000 babies** have their lives ended in the name of choice. Since **January 22, 1973**, over **46 million babies have died**. The time is now to stand on behalf of these innocent victims. Visit www.standtrue.com to find out how to be a voice.

A FEW LIFE DEVELOPMENT FACTS

20 days: Foundations of brain, spinal cord and nervous system are laid.

24 days: Heart begins to beat.

30 days: Child has grown 10,000 times to 6-7 mm (1/4") long. Brain has human proportions. Blood flows in veins (but stays separate from mother's blood).

35 days: Pituitary gland in brain is forming. Mouth, ears and nose are taking shape.

42 days: Skeleton is formed. Brain coordinates movement of muscles and organs.

Reflex responses have begun. Penis is forming in boys. (Mother misses second period.)

43 days: Brain waves can be recorded.

8 1/2 weeks: Fingerprints are being engraved. Eyelids and palms of hands are sensitive to touch.

9 weeks: Child will bend fingers around an object placed in the palm. Thumb sucking occurs. Fingernails are now forming.

10 weeks: Body is sensitive to touch. Child squints, swallows, puckers up brow and frowns.

11 weeks: Baby urinates, makes complex facial expressions - even smiles.

12 weeks: Vigorous activity shows distinct individuality. Child can kick, turn feet, curl and fan toes, make a fist, move thumbs, bend wrists, turn head, open mouth and press lips tightly together. Breathing is practiced.

13 weeks: Face is prettier, facial expressions resembling parents'. Movements are graceful, reflexes vigorous. Vocal chords are formed (but without air baby cannot cry).

Sex organs are apparent.

4 months: Child can grasp with hands, swim and turn somersaults.

5 months: Sleeping habits appear, but a slammed door will provoke activity. Child responds to sounds in frequencies too high or low for adults to hear.

6 months: Fine hair grows on eye brows & head. Eye-lash fringe appears. Weight is about 640g (22 oz.), height 23 cm (9"). Babies born at this age have survived.

7 months: Eye teeth are present. Eyelids open and close, eyes look around. Hands grip strongly. Mother's voice is heard and recognized.
